- Worked with others to maintain smooth store operations and high standards of customer service during high-volume rushes.

Chong's Siomai Rice Sta. Teresita
Crew Member — 2025-2026

- Assisted in daily operations and stock management
- Optimized workflow by maintaining a clean and organized work space.
- Handled cash transactions and maintained accurate sales records
- Helped implement simple process improvements to speed up order fulfillment

CERTIFICATIONS

CompTIA IT Fundamentals+ — **Nov 2023**
Cisco JavaScript Essentials 1 — **Oct 2024**
Back End Development and APIs — **Oct 2025**

PROJECTS

Grade Calculator | Full-Stack Developer
Technology: HTML, CSS, JavaScript

- Developed a web-based grade calculator that processes user inputs and computes final grades dynamically
- Implemented input validation and real-time calculations using JavaScript logic
- Made use of local storage and chrome web extension
- Focused on accuracy, usability, and clear data output

PocaSwap (Trade and E-Commerce) | Full-Stack Developer
Technology: PHP, MySQL

- Developed a trade and e-commerce web application with server-side logic using PHP
- Performed CRUD operations using SQL queries
- Designed and managed relational database tables for products, users, and transactions
- Implemented data handling, form validation, and basic authentication

Floravia (Flower Shop E-Commerce System) | Back-end Developer, Database
Technology: MEVN Stack (MongoDB, Express, Vue, Node)

- Implemented database queries for creating, updating, and deleting records
- Applied basic input validation to ensure correct data submission
- Ensured data consistency through schema validation
- Connected frontend components to backend services using JSON-based APIs
